GET TO KNOW QUESTFIELD SUMMER SCHOOL

Questfield International College warmly welcomes children aged **4 to 10 years** old to embark on our summer journey, where they can explore their individuality and passions in an **English-speaking setting**.

Rooted in **key leadership principles**, our program fosters **autonomy** and **responsibility**, empowering children to embrace their unique paths.

The Questfield Summer School experience is built on the foundation of **the mastery paradigm**, promoting courage and risk-taking as essential components of **personal growth**. We inspire children to **experiment, learn from mistakes**, and transform setbacks into valuable lessons. In contrast to performance-oriented programs that can lead to increased anxiety and diminished resilience, our mastery-centered approach cultivates **intrinsic motivation and engagement**, nurturing a genuine love for learning.

The entire teaching team here, at Questfield Summer School, is fluent in English, open, highly motivated and creative, but most of all dedicated to their profession. **Since teachers love teaching, they teach children to love learning.**

“Our child had a wonderful experience at Questfield's Summer School. The program was both fun and educational. Every day, Filip came home excited to share what he had learned and the new friends he has made. The swimming pool was his favourite.

The teachers were incredibly supportive and created a warm, welcoming environment. We're looking forward to future programs at Questfield!”

Raluca, Filip's mother

A PERFECT MIX OF FUN & LEARNING

Our Summer School is **open to everyone**, students of Questfield or of other schools, Romanian or of other nationality, little or big. Summer School participants come back every year, bringing their friends, little brothers and sisters, not only to the next Summer School, but also to other school events during the academic year.

CONCEPT

This year, we invite your children to embark on an exciting **journey around the world** without leaving the comfort of Questfield Summer School. Our unique Country-themed weeks concept is designed to enrich our students' understanding of diverse cultures, traditions, and languages, all while practicing English!

Over the course of eight weeks, our students will dive into the rich heritage of eight fascinating countries. Each week, we will focus on a different country, immersing our students in an engaging and educational exploration of its unique culture and traditions.

WHAT TO EXPECT DURING COUNTRY-THEMED WEEKS:

- **Cultural Immersion:** We bring the world to our students! They will delve into each country's rich history, fascinating traditions, and vibrant culture, learning about everything from national holidays to traditional clothing.
- **Culinary Delights:** Every week, our students will have a taste of the world, enjoying delicious meals and snacks prepared in the style of the country in focus. They will also learn about the origin and significance of these foods in their respective cultures.
- **Traditional Dances:** Each country has its unique dance forms that tell stories of their people and history. Our students will learn and perform these dances, gaining an appreciation for global artistic expression.
- **Language Practice:** While the medium of instruction will remain English, we will introduce key phrases and greetings in the language of the country we are exploring each week. This will enhance our students' linguistic skills and broaden their communication horizons.
- **Interactive Learning:** Our learning approach is hands-on and interactive. Students will participate in engaging activities like craft projects, performances, and even mini-Olympics based on the games played in the countries we are studying.

ACTIVITIES

The **activities** of Questfield Summer School are dynamic, organic, balanced, diverse, personalized and based on a mixture of 3 basic elements: Sports, Arts and Structured play. This international concept is based on the **routines of leadership, mastery and collaboration**, three key ingredients of life skills.

Children are engaged in a series of activities, being constantly motivated to get involved in different projects within the **weekly themes**. In addition to that, students' schedule is customised with various fun games and surprise events that nurture the children's curiosity and their need to experiment.

ENGAGING CLUBS & PROJECTS
